## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 2, drawn to a microtome having stiffening ribs.
- II. Claim 4, 6, 8 and 10 drawn to a microtome having a pivoting and illuminating device.
- III. Claims 5 and 9, drawn to a microtome having operating knobs.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I through III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. For example, subcombination I has separate utility such as a microtome for use in unstable environments. The inventions do not overlap in scope, and are not obvious variants. For example, I is distinct from II because a cutting apparatus with stiffening ribs does not require an pivoting and illumination device, it could be used without an illuminating device, or with an X-Y stage in lieu of a pivot. Similarly a microtome having an illuminating device could have a base with no stiffening ribs, or a different kind of stiffening feature, such as tubes. Each group above is similarly distinct from every other group. See MPEP § 806.05(d).

3. Claims 1 and 7 link(s) inventions I, II and III. The restriction requirement between the linked inventions is subject to the nonallowance of the linking claim(s), claims 1 and 7. Upon the indication of allowability of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise requiring all the limitations of the allowable linking claim(s) will be rejoined and fully examined for patentability in accordance with 37 CFR 1.104. Claims that require all the limitations of an allowable linking claim will be entered as a matter of right if the amendment is presented prior to final rejection or allowance, whichever is earlier. Amendments submitted after final rejection are governed by 37 CFR 1.116; amendments submitted after allowance are governed by 37 CFR 1.312.

Applicant(s) are advised that if any claim(s) including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

4. Applicant is advised that claims 1, 3, and 7 will be examined with the elected group.

5. Because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper. For example, Group I would

Art Unit: 3724

require a search directed towards structural features of the base of a cutter (text search for "base" "rib" "brace" "stability" "platform" etc.), whereas Group II would require a search directed towards Optical elements of a microscope objective (83/521 and text terms "focus", "focal length", "working distance", etc.). This constitutes an unacceptable burden on the Office.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sean M. Michalski whose telephone number is 571-272-6752. The examiner can normally be reached on M-F 7:30AM - 3:30PM.
